PROFESSIONAL DIPLOMA PROGRAM **LEVEL 5** DIPLOMA in **LOGISTICS MANAGEMENT**

PROGRAM OVERVIEW

The Logistics Management Diploma program provides students with the logistics knowledge and skills needed to work as competent logistics industry professionals. Successful completion of the program will enable graduates to work in a variety of private sector organizations. The program imparts sought-after logistics expertise and instills confidence through its emphasis on both theoretical and applied contemporary logistics industry training. The Logistics Management Diploma program is designed to meet the criteria for NQA diploma level 5 standards, including 1350 hours of program time and 90 credits with an appropriate distribution of knowledge, skills and application. This program will be conducted in English. Students will need to meet specific English Language requirements that include demonstrating English Language Proficiency.

The program assumes a 6 hour day for class contact time progressing to longer days that reflect a typical work day in the private sector. The program begins with a common Workplace Preparation phase, which is offered for a duration of 10 weeks. This phase will be all in-class delivery focusing on preparing the learner for the transition to a new workplace. The content will be based on input from private industry around expectations they have of their employees in terms of professional behavior, communications and a basic understanding of the sector.

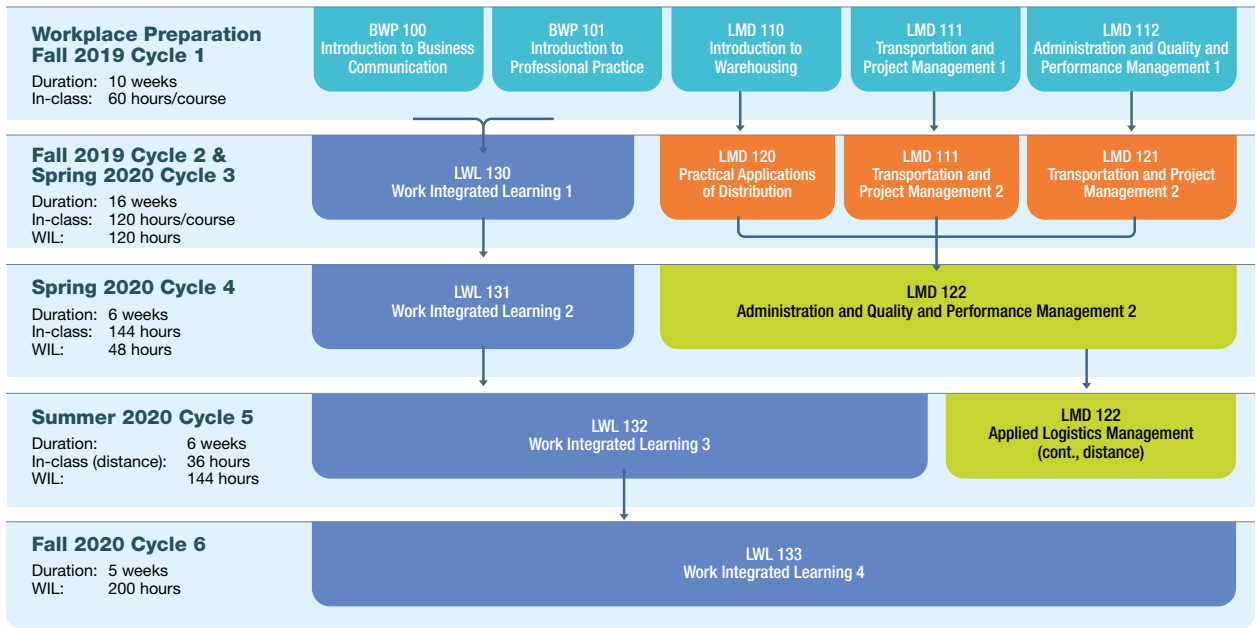

The mid phase is designed to introduce the learner to the new work environment with few days in-class and the remaining days in the workplace. The final phase is 100% Work Integrated Learning (WIL) in the workplace.

PROGRAM SCOPE STATEMENT

Graduates of the Logistics Management Diploma program will possess the applied knowledge, skills, and attitudes required to succeed in entry-level supervisory positions in the logistics industry. They will have mastered competencies related to logistics business processes, professional practice, administration, warehouse distribution, transportation, data analytics, communication skills, and quality/performance management. Graduates will be independent, critical thinkers who work well in team environments to provide customer-centric service and business results.

LWL 132	Work Integrated Learning 3	144
LWL 133	Work Integrated Learning 4	200
Total Hours		1352

ADMISSION

Students will be eligible to apply to enter the 'Level 5 Logistics Management Diploma' program where they hold a post-secondary Certificate. The program is open to male and female students in the age range of 25 to 35 wanting an entry-level program. The program targets mid-career professionals with some employment experience, especially logistics. In addition, students will need to meet specific English Language requirements and their English language skills will be assessed prior to admission.

Competencies and Assessment Environments

The Logistics Management program is centred on a Competency Based Education model whereby students will progress not by passing traditional assessments, but by mastering specific competencies in industry settings with the guidance of industry professionals. Students' weekly study hours will be divided between classrooms at HCT and hours spent

working in an industry internship. As such, students will be already 'embedded' in industry positions that may lead to permanent employment with those industry partners post-graduation.

This section defines the competencies required of Logistics Management Diploma program graduates.
